## CME ACCREDITATION DOCUMENT

### Swiss Medical Network – Mayo Clinic Oncology Summit 2026 5 – 6 November 2026 | Genolier Innovation Hub, Switzerland

#### 1. General Information

**Format:** On-site scientific symposium

**Duration:** 2 days

**Participants:** Approximately 150 healthcare professionals, including specialists involved in multidisciplinary oncology care

**Language:** English

**Target audience:** Medical oncologists, radiation oncologists, nuclear medicine specialists, visceral surgeons, urologists, gynecologists, and other physicians involved in oncology care, as well as advanced practice nurses

#### 2. Educational Objectives

At the end of this event, participants will be able to:

- Understand recent advances in precision oncology, including liquid biopsy and biomarker-driven treatment strategies
- Integrate emerging therapeutic targets (e.g. HER2-low and beyond) into clinical decision-making
- Evaluate the role of theranostics and nuclear medicine in oncology
- Apply multidisciplinary approaches to optimize patient management across the oncology care pathway
- Improve coordination of care, including survivorship and supportive care strategies
- Strengthen collaboration between medical, surgical and nursing teams

#### 3. Scientific Content

The program is structured around three main axes:

##### **Axis 1 – Precision Diagnostics and Personalized Treatment Planning**

- Innovation in biopsy techniques (including liquid biopsy)
- New therapeutic targets and biomarker-driven strategies
- Advances in theranostics
- Implementation of precision medicine

##### **Axis 2 – Continuity of Care Across the Patient Journey**

- Minimal residual disease in oncohematology
- Role of advanced practice nurses (APN)
- Cancer survivorship and caregiver involvement
- Supportive care and quality of care frameworks

##### **Axis 3 – Therapeutic Innovation and Personalized Treatments**

- Innovative therapeutic approaches including vaccination strategies
- Conservative treatment approaches in oncology (e.g. rectal cancer)
- Advances in radiotherapy (including ablative techniques)
- Targeted therapies beyond traditional indications

The program includes lectures, panel discussions and interactive workshops, fostering interdisciplinary exchange and practical application.

#### **4. Relevance for Medical Specialties**

The content is relevant to multiple specialties involved in oncology care:

- Medical oncology (systemic therapies, biomarkers, innovation)
- Radiation oncology (ablative radiotherapy, treatment indications)
- Nuclear medicine (theranostics)
- Visceral surgery (digestive cancers, multidisciplinary care)
- Urology (oncological management of urological cancers)
- Gynecology (oncological patient management and care pathways)

The program reflects a multidisciplinary approach, integrating medical, surgical and supportive oncology perspectives.

#### **5. Scientific Committee**

- Prof. Dr Oscar Matzinger, Chief Medical Officer, Swiss Medical Network
- Dr Matti Aapro, Medical Oncologist, Clinique de Genolier

#### **6. Duration of Educational Content**

- Day 1: approximately 6 hours of scientific sessions
- Day 2: approximately 4 hours of scientific sessions
- Total estimated scientific duration: 10 hours

Breaks, networking sessions, meals and social activities are excluded from the total educational duration. The duration has been calculated based on active educational content only.

#### **7. Educational Format**

- Plenary lectures
- Expert panel discussions
- Interactive workshops

These formats are designed to promote active participation, case-based learning and interdisciplinary exchange, ensuring direct applicability to clinical practice.

#### **8. Independence and Compliance**

- The scientific program is developed independently by the scientific committee
- No sponsor has any influence on the content, topics or speaker selection
- Industry partners are limited to visibility and exhibition presence

All faculty members will be required to disclose potential conflicts of interest prior to their presentation.

#### **9. International Dimension**

- Organized in collaboration with the Mayo Clinic
- Participation of internationally recognized experts
- Multidisciplinary and international perspective on oncology care
