WELCOME IN LUGANO

Dear Friends, Dear Colleagues,

We welcome you in Lugano for the annual congress of the Compagnons Hépatobiliaires, the family of surgeons who trained with Professor Henri Bismuth and his team at Paul Brousse. Several members of this family, key opinion leaders in the field of HPB surgery worldwide, will be in Lugano to share and discuss their experience with other renown Swiss and Italian colleagues.

The format of the meeting will be one day devoted to in depth discussion of clinical cases, and two days concentrated on advances in hepatic, biliary and pancreatic surgery, and on liver transplantation. As we will be among specialists, communications will be short (recommended 5', cutting on introductory slides) followed by lively discussions by a designated expert and by the floor.

The social programme will include a guided visit to a collection of Swiss art and two evenings in the beautiful surroundings of Lake Lugano.

We encourage you to join us, and to provide educational time to younger colleagues who will be able to follow the congress streamed on the YouTube channel of the "Compagnons hépatobiliaires": <https://www.youtube.com/@CompagnonsHepatobiliaires>

For registration, please visit the website of the congress:
